Please add any comments you wish about the following:

Course

- I love this course. I don't have any background knowledge at all, but course materials organized step by step. It made me easy to follow.

Instructor

- Dr.Raun is really enthusiastic. His attitude to class encouraged me a lot. After his lecture, I can spend a whole day with something energy I don't know how to express.
- I'm so fortunate to have a very experienced professor who not only share his knowledge and experience, but also share some life learnings. He is so enthusiastic and passionate about the field of soil fertility studies.

Instruction

- I learned a lot of new things with regards to N, P, K, and S fertility in soils. I hope we could also cover the other essential nutrients and also nutrient balance just in case we will encounter this problem in the field.

Teaching Assistants / Associates

The evaluation will not be displayed due to low response rate.

Laboratory, Practicum, or Discussion Section

The evaluation will not be displayed due to low response rate.

Work Load

The evaluation will not be displayed due to low response rate.

Examinations

- The every meeting quiz is very good to me that way we are always forced to remind ourselves to study before coming in to class.

Grading

The evaluation will not be displayed due to low response rate.

Textbook

- I like that the materials that we used in class are available all the time in the website and mostly are recent findings of research.

Other Comments

The evaluation will not be displayed due to low response rate.
